Code:
1st File

```python
class User:
    Total = 0
    def __init__(self, first_name, last_name, followers_count,
friends_name):
        self.first_name = first_name
        self.last_name = last_name
        self.followers_count = followers_count
        self.friends_name = friends_name
        User.Total +=1
    def introduce_self(self):
        print(f"\nHi I am {self.first_name} {self.last_name}")

    def view_full_profile(self):
        print(f"Profile Name is {self.first_name} {self.last_name} with
{self.followers_count} followers ")
        print(f"Your friends are: {self.friends_name}")

class TestUser:
    Tot = 0
    def __init__(self, first_name, last_name, followers_count,
friends_name):
        self.first_name = first_name
        self.last_name = last_name
        self.followers_count = followers_count
        self.friends_name = friends_name
        TestUser.Tot +=1
    def introduce_self(self):
        print(f"\nHi I am {self.first_name} {self.last_name}")

    def view_full_profile(self):
        print(f"Profile Name is {self.first_name} {self.last_name} with
{self.followers_count} followers ")
        print(f"Your friends are: {self.friends_name}")
```

2nd File

```python
from main import TestUser
def social_media():
    friends = []
    while True:
        record = input("\nInsert a Record[y|n]: ")
        if record.lower() == 'y':
```

```python
            first_name = input("\nFirst Name: ")
            last_name = input("Last Name: ")
            followers = input("Followers: ")
            friend = input("Friends: ")
            friends.append(TestUser(first_name, last_name, followers,
friend))
        elif record == 'n':
            print("\nHere are the Records.....")
            for f in friends:
                f.introduce_self()
                f.view_full_profile()
            print(f"\nThere are currently {TestUser.Tot} Members in the
Social Media page\n")
            break
        else:
            print("Invalid Choice")

if __name__ != '__main__':
    pass
else:
    social_media()
```

Output:

```
Insert a Record[y|n]: y

First Name: Bradd
Last Name: Pitt
Followers: 10
Friends: Juan Pedro Jose

Insert a Record[y|n]: y

First Name: Tom
Last Name: Cruise
Followers: 1000
Friends: Juan Pedro Jose

Insert a Record[y|n]: y

First Name: Daniel
